Support to the Lebanese Civil Defense

Updated May 2026

UNDP, with funds from the German Government through KfW Development Bank, has been strengthening the response capacity of the Lebanese Civil Defense across the country through the construction and rehabilitation of civil defense centers, which were prioritized through participatory local dialogue (the Mechanism for Stability and Local Development/MSLD), as well as the provision of firefighting vehicles, ambulances, critical life-saving equipment, and safety gear.

Addressing the extremely challenging conditions of emergency service providers and in light of very limited resources, these efforts contributed towards increasing the safety, efficiency, and effectiveness of the Civil Defense operations, while having a wider impact that safeguards lives, livelihoods, and the environment in Lebanon.

In the wake of the 2024 hostilities, UNDP scaled up its support to the Lebanese Civil Defense, reprogramming USD 3.4 million of the German contribution to help enhance the critical rescue and response efforts. This came on top of the mobilization of USD 450 thousand through UNDP's Funding Window mechanism.

Overall Support to Civil Defense | 2024 - 2026

Total Funding: USD 5,378,814 Million

National

Crisis Response - Reprogramming)

Investment: USD 3,467,768

Equipment Delivered

Protective Gear

- 600 Personal Fire Protective Suits
- 225 Ballistic Helmets & Fragmentation Vests
- 1,500 Heavy Duty Working Gloves
- 50 Gas Monitoring Equipment
- 3,000 Boots (Ringers)
- 4,000 Daily Work Suits
- 435 Breathing Apparatus Sets with Spare Parts

Fire Suppression Tools

- 187,830 Liters Foam
- 31 Automatic Nozzles (500 LPM, 2.5" Male BSI)
- 12 Foam Tubes (500 LPM)
- 1,853 Hoses (20m, with coupling: 1", 1.5", 1.75", 2.5")
- 200 Fire Beaters
- 150 Portable Wildfire Water Pumps

Rescue Tools

- 150 Pulaski Tool
- 100 Hooligan Tool 36 inch
- 25 Rescue Cushions
- 5 Hydraulic Cutters (Battery Operated)
- 5 Hydraulic Rams (Battery Operated)
- 150 Mcleod Two-Sided Blades
- 10 Thermal Imaging Cameras (for Firefighting Professionals)
- 15 Engine Chain Saws (Wood)
- 24 Engine Driven Circular Saws (Steel/Concrete)

Lighting Equipment

100 Portable Handle Firefighter Flashlights

Vehicle Equipment

110 Wheels for Fire Trucks

Medical Equipment

350 First Responder Trauma Bags

Regional (Regular Support) Investment: USD 1,911,046

Construction of Two Civil Defense Centers in Minnieh and Manara

Vehicles and Equipment

Al-Sahl Union of Municipalities - Bekaa

- 1 10,000L Fire Truck
- 2 7,000L Fire Truck
- 3 UTV for Firefighting
- 5 Equipped Double-Cabin Pickup Truck
- 30 Personal Fire Protective Suits
- 5 Self-Contained Breathing Apparatus

Minnieh - North Lebanon

- 1 10,000L Fully Equipped Fire Truck
- 1 Fully Equipped Ambulance
- 30 Personal Fire Protective Suits
- 4 Self-Contained Breathing Apparatuses

Impact Summary

- Strengthened operational capacity of Civil Defense across multiple regions.
- Enhanced safety and efficiency of first responders.
- Improved readiness for future emergencies and natural disasters.
- Increased capability of Civil Defense supporting more than 35,000 missions per year

Looking Ahead

As part of the ongoing implementation of UNDP's Local Development Project, with funds from the German Government through KfW Development Bank, UNDP is shifting from supporting immediate crisis response needs towards long-term readiness at the regional level.

The strategy includes equipping the Civil Defense teams and enabling them to reach any emergency location within seven minutes, as well as linking local communities with national authorities to strengthen response capacities within comprehensive national plans.
